

Introducing the Albert Jackson Processing Centre: Designed and built for the future of ecommerce

24-04-2024

Located in northeast Toronto, this 585,000 square-foot sorting facility is our largest parcel plant, with nearly eight kilometres of conveyors and the capacity to process more than one million packages a day. It can sort items to more than 300 Canada Post facilities - more than twice as many as our Gateway facility in Mississauga. This critical hub will strengthen our national network to help us deliver the consistent and reliable service you depend on.

Canada's largest zero-carbon facility
But that's not all. The Albert Jackson Processing Centre is our first net-zero carbon building and leads the way as the largest industrial project in Canada with the Zero Carbon Building Standard designation. It's part of our commitment to help you and your customers make sustainable shipping choices and a key milestone on our path toward net-zero greenhouse gas emissions by 2050.

Looking ahead while paying respect to the past

While the Albert Jackson Processing Centre was built with the future in mind, its name pays respect to the past. The facility was named after Albert Jackson, who is believed to be the first Black letter carrier in Canada.

Through the Albert Jackson Processing Centre, we're redefining what it means to deliver – and we're just getting started.
