

Posti achieves EcoVadis Gold rating with its highest-ever score

24-08-2026

Posti has once again been awarded Gold rating in the international EcoVadis sustainability assessment. In the latest evaluation, Posti achieved its highest score ever: 86 out of 100 points.

This result places Posti among the top 2% of companies worldwide assessed by EcoVadis, which has evaluated approximately 150,000 companies globally. The ranking reinforces Posti's position among sustainability leaders and reflects the progress of its long-term sustainability efforts across multiple areas.

EcoVadis assesses companies' sustainability performance in four areas:

- Environment
- Labor & Human Rights
- Ethics
- Sustainable Procurement

"This is great recognition for us and an important indication that our sustainability work continues to develop. We are especially pleased to have achieved the highest EcoVadis score in our history and to be ranked among the top 2% of companies globally. The result reflects the long-term commitment to advancing sustainability throughout our organization. A warm thank you to all Posti employees for this shared achievement," says Anna Storm, Vice

President, Sustainability & Stakeholder Relations at Posti.

Significant progress across key sustainability areas

Posti improved its performance in three of the four categories assessed by EcoVadis while maintaining its already excellent level in environmental performance. This year, the most notable improvements were seen in Labor & Human Rights, Ethics, and Sustainable Procurement.

- Labor & Human Rights: 87/100
- Sustainable Procurement: 89/100
- Ethics: 80/100
- Environment: 86/100

The results demonstrate that sustainability is an integral part of Posti's daily operations, decision-making, and business development. Strong performance across all assessed areas reflects long-term efforts and the systematic advancement of sustainability throughout the organization.

"EcoVadis has raised its assessment criteria,

and the number of participating companies continues to grow. It is positive to see the bar getting higher. At the same time, it encourages us to continue working together towards a more sustainable future," Anna Storm continues.

Highest leader level maintained in Carbon Scorecard

Posti has been working consistently to reduce emissions for many years. In the separate Carbon Scorecard assessment, Posti maintained the highest possible Leader rating.

In 2025, Posti's own emissions (Scope 1 and Scope 2) decreased by 25% compared to the previous year. Posti also achieved its Science Based Targets initiative (SBTi) target of reducing its own emissions by 50% by 2030 already in 2025, reaching the goal five years ahead of schedule.

EcoVadis is a global sustainability ratings provider. Its assessments are based on company documentation, media sources, and publicly available information.
