EURODIS grows in France as Ciblex becomes local member

11-02-2020

European delivery network EURODIS has integrated Ciblex as its new member for France to strengthen its international transport network for parcels and pallets in 36 European countries. Ciblex, which sees itself as the third-largest express delivery company in France, has already been the networkâ€™s local partner in Belgium, where it has a strong presence, since 2015. In 2019, Ciblex handled 70 million parcels in France through its network of 140 depots and 3000 daily last mile delivery tours. Its main client sectors include health, optics, high tech, automotive, retail, e-commerce and communications. â€œWe are delighted to welcome Ciblex for a second country in our network of strong national members,â€ said Jens Reibold, Managing Director of EURODIS GmbH, the organisation that steers the European network. â€œCiblex fits very well into our network as it has a strong focus on quality and B2B services.â€ He added: â€œBefore we had a pure delivery partner in France. Therefore, the integration of Ciblex is a strategic change, and we are happy that we won a member who is committed to further develop our network.â€ Ciblex will be gradually integrated into the EURODIS operatior for imports to France while its exports are already going through the European network. â€œOn an operational level we have a step by step integration of Ciblex,â€ Reibold explained. â€œThis means that we do not hand over all our volume to Ciblex at once, but in phases based on the dispatch country.â€
