

Omniva restores delivery services to the Middle East

15-04-2026

Omniva has resumed shipment traffic to Middle Eastern countries following the earlier temporary suspension due to the security situation in the region. Shipments to Kuwait remain affected, with delays and limited service availability.

While services to most destinations have now stabilised, the ongoing conflict continues to impact logistics chains and transit times.

We are working closely with our international logistics partners to minimise disruptions and gradually restore full service levels. Customers sending shipments to the region are advised to consider potential

delays and follow the latest updates on our website.

Omniva remains committed to providing reliable international delivery and will continue to monitor the situation closely, informing customers promptly of any changes.
