# Omniva was awarded the Certificate in Corporate Social Responsibility and the gold level Quality Label

06-06-2019

Omniva was awarded the Certificate in Corporate Social Responsibility and the gold level Quality Label. Over the past year, the company has made great progress and contributed to solutions that value a clean natural environment and make life better for people. Omniva has successfully launched an economical driving programme that, in addition to reducing air pollution, also saves fuel and maintenance costs.

In 2018, we started using electric vans in both Estonia and Latvia and installed a solar park on the roof of the new logistics centre. We are constantly working to make Omniva's work environment more family-friendly as well as employee-friendly.

It is important for us to act responsibly. We care about the nature, people, and world around us. We are committed to honest and sustainable development and are working to make the impact of our business as positive as possible everywhere.

This year, 78 companies earned the Certificate in Corporate Social Responsibility. Since March 2019, Omniva is also a member of the Estonian Corporate Social Responsibility Association.

The Quality Label is awarded to companies that have participated in the Estonian Corporate Social Responsibility Index, value sustainable development, and consistently work to increase their positive impact on the surrounding environment.

In 11 years, the bronze, silver, or gold level of the Corporate Social Responsibility Index has been awarded to several hundred different companies operating in Estonia. The Corporate Social Responsibility Labels for 2018 were handed over at the gala held on 22 May at the Tallinn Creative Hub, where the Estonian President Kersti Kaljulaid also participated.

Omniva is the leader of e-commerce and plays an important role in advancing the economic life of Baltic States. We lead the parcel terminal market of Estonia, Latvia and Lithuania. Omniva group employs 2,300 people across the Baltics, and the turnover in 2017 was 99.8 million euros.
