

## Building for the future: Australia Post's multi-million-dollar investment in regional NSW

19-05-2025

Australia Post is expanding its commitment to regional Australia with a major infrastructure investment across New South Wales, announcing the development of six new greenfield sites in Tumut, Leeton, Casino, Deniliquin, Forbes and Byron Bay. These sites will bolster capacity to support parcel volume growth and improve service across rural and regional communities.

These purpose-built facilities are designed to boost parcel processing capability – handling between 900 parcels to 2,200 parcels per day – and enhance service across rural and regional communities as well as improving operational safety and efficiency.

Sustainability is a key focus of the expansion, with all sites featuring 50kW rooftop solar power generation, and a number also investing in rainwater harvesting and EV charging capability.

Australia Post General Manager Network Development & Support Services, Shane Plant said the investment reflects Australia Post's commitment to improving services for regional communities across Australia.

"In New South Wales, we've seen online purchases increase by 2.8% year-on-year, with data indicating that 82% of NSW households are now shopping online<sup>1</sup>. As regional areas increasingly depend on

eCommerce due to fewer physical retail offerings, these purpose-built sites will enable Australia Post to meet the growing parcel demand in these regions.

"Beyond speed and efficiency, we're focused on providing safer workplaces for our team members and building environmentally responsible infrastructure that can serve communities well into the future," Mr. Plant said.

The details and timelines for each of these new sites are as follows:

- Tumut: Construction has commenced on the 600m<sup>2</sup> site, with plans to open in late 2025.
- Leeton: Construction on the 1,105m<sup>2</sup> site will begin in early 2026, with an expected opening towards the end of that year.
- Casino: Construction on the 1,350m<sup>2</sup> site will begin in early 2026, with an expected opening towards the end of that year.

- Deniliquin: Construction on the 1,335m<sup>2</sup> site will begin in early 2026, with an expected opening towards the end of that year.
- Forbes: Construction on the 1,796m<sup>2</sup> site will begin in early 2026, with an expected opening towards the end of that year.
- Byron Bay: Construction on the 3,072m<sup>2</sup> site will begin in mid-2026, with the site expected to open by mid-2027.

As part of this regional expansion a brownfield site has also been secured in Narrandera. Further brownfield sites in Cooma and Ballina are in lease negotiations.

This investment in regional NSW is part of a broader commitment to support growth in regional Australia, with additional sites to be rolled out across all regional Australian States & Territories.
