

## Pos Malaysia Group Reports Second Quarter Fiscal Year 2025 Results

20-08-2025

Pos Malaysia Berhad (â€œPos Malaysiaâ€ or â€œThe Groupâ€) today announced its C FY2025 financial results, reporting a positive improvement. The Group delivered a revenue of RM441.6 million for the second quarter, while its Loss Before Tax narrowed to RM42.3 million, reflecting an improvement of 17.4 percent.

Although the Postal segment continues to be challenged by structural declines, intense competition and a challenging regulatory courier landscape, Pos Malaysia delivered solid parcel volume growth from the continued integration of mail and parcel operations. Meanwhile, the Retail segment maintained steady year-on-year performance through operational efficiencies, digitalisation efforts, and new service offerings aligned with evolving customer behaviours.

The Aviation segment registered strong performance during the quarter, bolstered by growth in cargo handling, inflight catering, and engineering services, driven by sustained regional air traffic recovery and market-leading operations.

Performance in the Logistics segment softened, owing to dampened demand in the automotive and freight sectors coupled with extended downtime of one marine vessel, which is expected to resume service

in early Q3. Despite these headwinds, the company continues to accelerate its third-party logistics (3PL) growth strategy and build operational efficiency.

Charles Brewer, Group Chief Executive Officer of Pos Malaysia Group said, "At Pos Malaysia, we are entering the next chapter of our transformation journey—one that is focused on long-term financial sustainability, regulatory reform, and evolving our business models to meet the needs of a rapidly changing world. Our commitment is clear: to deliver on our purpose, our 'amanah', our social responsibilities and deliver lasting value for our stakeholders, all while embedding Environmental, Social, and Governance (ESG) principles across every aspect of our operations, from reducing carbon emissions to promoting responsible supply chains."

He continued, "We recognise the challenges posed by a difficult and dynamic external landscape, and therefore, the outlook for the

remainder of FY2025 remains demanding. However, we are confident that our continued focus on innovation, enhancing operational efficiencies, and adapting to

market dynamics will continue to drive progress and create value for all.”
