ALLESPOST: NEW MONTHLY SUBSCRIPTION FOR CONVENIENT PARCEL RECEIPT

10-11-2025

With AllesPost, online shoppers can conveniently and flexibly receive all their parcels â€“ regardless of sender or parcel service â€“ with Austrian Post. At the beginning of November, the service introduced a new subscription model. The AllesPost subscription now runs flexibly on a monthly basis, similar to Netflix, Spotify, and other services, and can be canceled at any time. Anyone who wants to reliably receive all their parcels by mail during the Christmas season will find AllesPost to be the ideal solution.

Another new feature is that only those parcels not already delivered by the postal service are counted. This results in two attractive subscription options:

AllesPost Standard: €2.90 for 5 parcels per month
AllesPost Premium: 5.90 for 15 parcels per month
Peter Umundum, Deputy Director General, Board Member for Parcel & Logistics: “More than 200,000 parcels were handled via AllesPost last year alone, and the trend is rising. This demonstrates the relevance of our service and how much recipients value the high quality of Austrian Post. With our new subscription model and the associated benefits of all postal delivery options, AllesPost is becoming even more attractive – just in time for the Christmas season.”

COMBAT PARCEL CHAOS: HOW ALLESPOST WORKS

Online shoppers usually can't choose which parcel service delivers their orders. That's why Austrian Post introduced AllesPost back in 2019: Users of the service receive their own AllesPost address at a postal logistics center, which they enter as their delivery address at checkout. All parcels from other parcel services are then taken to this address, where they are received by Austrian Post and usually delivered the next business day.

FREEDOM IN PARCEL RECEIPT: POST OFFICE RECEIPT OPTIONS

With AllesPost, the guesswork about where your parcel will end up is over. With the postal service now handling deliveries, users have access to all familiar delivery options. Parcels can be delivered as usual or redirected via the Post app to a post office, a postal partner, a Hermes ParcelShop, a neighbor, or a 24/7 post office. Delivery to parcel lockers or leaving parcels in a secure location is also

possible for all parcels.

Convenience means that recipients don't have to plan their lives around a parcel, but rather the parcel can adapt to their lives. AllesPost makes this possible with every delivery.
