Updated parcel delivery service to the USA for private customers

03-03-2026

Lithuanian Post announces that the parcel delivery service to the United States for private customers will be resumed from March 3, 2026. This is an important step, enabling residents to once again conveniently and safely send goods and personal parcels to one of the world's largest markets.

A customs administration fee of EUR 2.29 (including VAT) will be applied to shipments to the USA. This is intended to cover additional logistics and data processing costs.

To use the updated service, private customers must confirm their consent to the payment of customs and administrative fees. This can be done by logging into their LP EXPRESS self-service account and checking the appropriate consent in the profile editing section.
