

New packaging bags from Paketa24 - a practical and sustainable solution for your shipments

27-10-2025

Croatian Post is introducing Paketa24 packaging bags to its offer for the first time, a new product that combines functionality, environmental responsibility and modern design.

The bags are made of recycled material, which contributes to waste reduction and environmental protection. In addition to being strong and waterproof, they are extremely lightweight, making them a practical choice for everyday sending of parcels.

Thanks to the self-adhesive tape, the bags can be closed easily and securely, and their reopening is not possible without visible damage. The marked space for the address label further facilitates and speeds up the preparation of the parcel.

The packaging bags are particularly suitable for sending clothing, shoes, bags and other fashion accessories, while sensitive or sharp-edged contents still need to be additionally protected in accordance with the instructions for packaging parcels.

Recognizable by their red color and the

Paketa24 logo, the bags come in two sizes:
265 × 350 mm
330 × 430 mm

A new, larger size of 405 × 530 mm will soon be available, developed based on feedback from users who expressed a need for larger formats, for example for packaging jackets.

Packaging bags are currently available in 400 post offices at very affordable prices. A smaller bag costs only 30 cents, and a larger one costs 40. Given that the bags are very well received by users, they will soon be available in all post offices.

Croatian Post continues to listen to market needs and develop solutions that are sustainable, practical and user-friendly. Pack simply, safely and responsibly - with Paketa24 packaging bags.
