Expect longer delivery times in Latvia and Lithuania due to lockdown

22-01-2021

Ongoing COVID-19 outbreak and current restrictions in Latvia and Lithuania have resulted in short delays in last-mile delivery.

Due to current restrictions in the countries, e-commerce parcel volumes are significantly higher than usual. As a result, local delivery may experience short-term delays in Latvia and Lithuania.

Local people and businesses have been informed of possible longer delivery times. We have also introduced special measures similar to the pre-Christmas period in Latvia and Lithuania to ensure normal delivery speeds as soon as possible.
