

Investments that further the promise of more efficient deliveries

22-10-2026

24 new trucks and 12 trailers mean more than just a modernized fleet. For PoÈ™ta RomânĂf, the investment strengthens transport capacity, streamlines connections between logistics centers and creates the premises for courier services better adapted to customer needs.

When a parcel sets off for its destination, there is an entire network of operations behind the delivery. Transport between logistics centers, volume handling capacity and route organization influence the efficiency of the process. FLOTA ZOR supports the development of courier services through investments in infrastructure and transport.

More space, more flexibility

The integration of the 24 trucks and 12 trailers adds approximately 1,670 cubic meters and 420 tons to the transport capacity. Each assembly can take up to 32 euro pallets, allowing for the transport of larger volumes in a single trip.

This additional capacity provides more flexibility in planning shipments and managing volume variations between logistics centers. For customers, the investment contributes to a network better prepared to pick up and transport packages efficiently, even when demand increases.

Technology for safer operations

Modern assistance and safety systems

support drivers, and a five-year, unlimited mileage warranty supports long-term operation. The new vehicles complement investments in 80 vans introduced in the fleet modernization program.

At the national level, the Romanian Post operates over 1,000 vehicles, serving all 41 counties and the municipality of Bucharest. The consolidation of high-capacity transport strengthens connections between regions and supports the organization of parcel flows.

A step towards a regional logistics hub

The ZOR FLEET is part of the transformation of the Romanian Post, oriented towards modern services and an infrastructure adapted to market requirements. An expanded transport capacity creates the premises for more efficient planning, better volume management and more predictable services.

Through this investment, PoÈ™ta RomânĂf is consolidating its national network and supporting its ambition to become a relevant logistics hub in Eastern Europe. More capacity, facilitated operations and stronger

connections between regions: concrete
benefits that take FLOTA ZOR further, for

customers in Romania.
