

E-commerce drives postal revenue up in 2024

10-07-2025

â€¢ Preliminary 2024 results show a modest revenue growth of 2.1% for posts worldwide â€¢ Complete 2024 results as well as results for the first half of 2025 to be unveiled in the IPC Global Postal Industry Report, in November 2025

Brussels, 10 July 2025 – According to preliminary results published today by International Post Corporation (IPC), postal operators worldwide saw revenue increase by 2.1% on average in 2024 ⁽¹⁾, mainly driven by parcels.

Holger Winklbauer, CEO of IPC, commented on the results: *“Preliminary results show that posts’ efforts to increase efficiency while at the same time to capture the e-commerce growth, paid off. The overall economic uncertainty continues however to put pressure on posts and calls for posts to pursue their transformation.”*

While global letter mail volumes dropped, reflecting continuing digital substitution, parcel volumes are rebounding, with online

shopping and cross-border e-commerce as key drivers. Regulatory obligations (universal service mandates, price caps in some regions) continue to constrain pricing flexibility and add burden, especially for legacy mail networks and in rural areas.

The industry is responding by diversifying services (e.g. financial services, logistics) and investing in automation and digital platforms to increase efficiencies and improve service. Rising cross-border online shopping is lifting parcel flows. Posts are expanding e-commerce services to capture this trend. In Asia Pacific, a growing middle class and urbanisation are driving parcel demand.

Energy and labour costs are high. Despite wage pressures and fuel prices, parcel unit prices have been under competitive pressure. Posts are introducing automation and optimising networks to contain costs.

The industry outlook is cautiously positive, though success will depend on managing costs and sustaining parcel momentum. Potential upside comes from further e-commerce acceleration and new service offerings (same-day delivery, digital/identity services).

The complete 2024 results will be presented in the IPC Global Postal Industry Report, which will be published in November 2025. The report will include a comprehensive and detailed review of the postal industry, covering over 50 postal operators worldwide

and analysing key market trends. A publicly available summary, the IPC GPIR Key Findings, will also be published in November.
