Omniva to install parcel lockers in Estonian villages and communities starting in March â€“ first locations announced

30-01-2026

International technology and logistics group Omniva will begin installing a new network of parcel lockers designed for smaller communities in Estonian villages and settlements in March. The aim is to make sending and receiving parcels convenient also outside larger centres. A total of 150 parcel lockers will be installed this spring, and around 400 by the end of the year. The locations of the new lockers are selected in cooperation with local municipalities.

“Omniva’s goal is to develop a dense, close-to-home parcel infrastructure across Estonia, making e-commerce — which people increasingly prefer — conveniently accessible also in smaller communities. We are moving towards a future where every Estonian settlement has its own parcel locker,” said Martti Kuldma, CEO of Omniva.

“Community parcel lockers are specifically designed for rural areas — they are battery-powered, quick to install and relocate, and can be expanded modularly from 7 to 21 compartments,” Kuldma added.

The locations of the new lockers are identified in cooperation with local municipalities and communities, who know their area’s movement patterns and everyday service needs best. Based on their proposals, the first confirmed locations have been selected.

The first confirmed locations in Estonia are:

• Martna village, Lääne-Nigula municipality, Läänemaa (Martna Municipal Office)

• Kullamaa village, Lääne-Nigula municipality, Läänemaa (Kullamaa Municipal Office)

• Kooli 1, Varstu small town, Rõuge municipality, Võrumaa

• Mäe 27, Mikitamäe village, Setomaa municipality, Võrumaa

• Suuremõisa village, Hiiumaa municipality, Hiiumaa (Coop Suuremõisa store)

• Kooli St 2, Õru small town, Valga municipality, Valga County

• Leeskõrve tee 3a, Kolga small town, Harju County

• Tähepaju tee 5, Oru village, Kose municipality, Harju County (Meie Toidukaubad Oru)

• Kooli 7, Sadala small town, Jõgeva municipality, Jõgeva County (Sadala Coop store)

• Turu St 1, Käru small town, Türi municipality, Järva County

• Kesk tee 6, Ardu small town, Kose municipality, Harju County (Ardu Library)

• Pärtlemäe tee 1, Ääsmäe village, Saue municipality, Harju County (Meie Toidukaubad Ääsmäe)

• Harju-Risti village, Lääne-Harju municipality, Harju County (Meie Toidukaubad Harju-Risti)

• Jõgeva mnt 1, Puurmani small town, Põltsamaa municipality, Jõgeva County (Puurmani Konsum)

• Pala village, Peipsiääre municipality, Tartu County (Pala Konsum)

• Vara village, Peipsiääre municipality, Tartu County (Vara Community Centre)

• Tallinna mnt 6, Adavere small town, Põltsamaa municipality, Jõgeva County (Adavere Konsum)

• Kavastu village, Luunja municipality, Tartu County (Kavastu bus shelter)

• Soometsa tee 9, Uulu village, Häädemeeste municipality, Pärnu County (Uulu Konsum)

• Kurase, Sääre village, Kihnu municipality, Pärnu County (Kurase store)

In addition, 16 new locations have been confirmed in Latvia and 20 in Lithuania. Analysis to identify the most suitable locations for the remaining lockers in the first phase is still ongoing. Omniva will soon also launch a public call for proposals for new parcel locker locations.

Parcels can be collected from the new lockers in the familiar way — customers receive a notification with a pickup code via SMS, email or the Omniva app, according to their preference. To open the locker, the code must be entered on the keypad. To send a parcel, it must first be registered in the Omniva app or self-service environment and then taken to the locker.

The locker keypad and compartments are accessible to wheelchair users, and the keypad includes Braille numbering.

Once the installation date of a specific locker is confirmed, Omniva will inform local residents about the installation and usage instructions via the municipality and, where possible, local media and social media channels.
