

Important update: Omniva courier pick-up orders via OMX system

19-09-2025

Omniva would like to inform business customers about an important change regarding courier orders placed through the OMX standard API.

Starting September 24, pickup requests will only be available within the specific time zones assigned to your service area. Orders submitted outside of these designated time slots will no longer be accepted by the system.

What this means for you?

When placing courier requests via the OMX system, please ensure your chosen pickup time falls within the available time zones.
