

Parcels remain key growth driver for postal industry in 2019

15-07-2020

“Preliminary 2019 results show a revenue growth trend of 4.2% for posts worldwide. Mail volumes continue to decrease but e-commerce remains an essential engine for postal growth. Many posts reporting logistics and financial services revenue saw growth in these areas

Brussels, 15 July 2020 – The global postal industry reported continued growth for the 2019. Full-year 2019 results show slightly lower growth of 4.2%¹ compared to 5% growth in 2018, according to preliminary results published today by International Post Corporation (IPC). The results illustrate that diversification is still paying off as non-mail services account for a growing share of industry revenue.

increasing network capacity and efficiency in order to respond to higher parcel volumes, both domestically and internationally. >Winklbauer continued: “Posts have also intensified their diversification efforts and new service offerings alongside traditional mail - the share of non-mail services continued to increase in 2019. While parcels remained a key revenue driver, many posts reporting logistics and financial services revenue saw growth in these areas.”

Complete 2019 results as well as results for the first half of 2020 will be presented in the IPC Global Postal Industry Report to be published in November 2020. The report will include a comprehensive and detailed review of the postal industry, covering over 50 postal operators worldwide and analysing key market trends as well as first implications from COVID-19 crisis. A publicly available summary, the IPC GPIR Key Findings, will also be published in November.

Holger Winklbauer, CEO of IPC said: “Postal industry revenue is showing solid growth, notwithstanding ongoing traditional mail decline and many other market challenges. Many of the posts analysed reported year-on-year growth, mainly driven by e-commerce. Posts continue to work on

About International Post Corporation
International Post Corporation (IPC) is the leading service provider of the global postal industry that provides leadership by driving service quality, interoperability and business-

critical intelligence to support posts in defending existing business and expanding into new growth areas. It is a cooperative association of 25 member postal operators in Asia Pacific, Europe and North America. IPC's solutions and services are used by over 180 posts worldwide. Since 1989 IPC has set standards for upgrading quality and service performance and developed technological solutions that help members enhance service for international letters, packets and parcels. IPC engages in industry research, creates business-critical intelligence, provides a range of platforms and programmes for member post CEOs and senior management to exchange best practices and discuss strategy. IPC also manages the system for incentive-based payments between postal operators.
