

Posti has already delivered the government's coronavirus info packages

09-04-2020

Posti has been helping to distribute the authorities' letter to citizens regarding the coronavirus. Posti's task was to deliver important information packages in parts of Finland. Some parts of the country were covered by another delivery company.

In the postal code areas assigned to Posti, the letters to citizens were delivered on April 2 in the Helsinki area. More letters have been delivered yesterday, Wednesday, April 8, as well as today, Thursday, April 9.

“Based on our delivery persons' feedback from the delivery routes, we have been able to deliver our share of the letters to the recipients' homes as agreed. In this coronavirus crisis, the importance of cooperation between the different actors has

been highlighted even more than before. It is natural and important for Posti to do our bit for social responsibility,” says Posti's Sami Reponen.

In Keminmaa and Virrat, the letter to citizens will be delivered to some households after Easter because Posti did not receive a sufficient number of the letters to deliver them to all homes.
