

Letter and parcel shipments to an additional five destinations in Asia resumed

25-05-2020

Beginning Wednesday 20 May, bpost will resume letter and parcel shipments to a further five destinations:

Hong Kong
Taiwan
Japan
Singapore
South Korea

This means that customers will again be able to drop their letters and parcels in the red post boxes and at post offices from this date.

These destinations are added to the list of countries to which bpost resumed shipments on 12 May. These are the United States, Canada, Brazil, Russia and China.

Since the suspension of letter and parcel shipments outside Europe was announced on 19 March, bpost has worked tirelessly to find

the right solutions and alternatives to enable the earliest possible resumption of all these activities.

bpost Group will do everything in its power to ensure this mail is delivered as quickly as possible to all destinations.

However, there may still be some delays, depending on the number of flights and available capacity, as well as the local delivery situation.

Updated information on the situation is regularly published on the bpost website and at <https://news.bpost.be/en-corona>
